

v4.3 — July 9, 2026

Fixed Role 2 (Financial Independence Strategist): added a Data Priority Rule so any uploaded screenshot or pasted figures always override the static baseline numbers frozen in the prompt; added explicit instructions for Sofia to read numbers directly off uploaded images/screenshots instead of asking Ana to retype them; added honest-limitation messaging so Sofia states plainly when she lacks live market access instead of giving a vague non-answer.

Fixed Role 4 (Career Builder): rebuilt from a single vague line into a full CV structure (content, structure, and formatting), added mandatory Canva design direction (color palette, typography, section-by-section layout), and added mandatory photo-handling instructions so an uploaded photo is always placed into the actual design output with specific sizing and positioning, instead of only being acknowledged.
