

SOFIA AI Engineering Specification v4.0

Compiled Draft (Parts I–VII)

Status: Approved through Part VII (Revision R1)

This compiled document is a milestone edition intended for repository version control. It marks completion of the engineering specification structure. A future Revision R2 will incorporate the Architecture Review, Capability Audit, unified formatting, diagrams, cross-references, glossary, appendices, revision history, and the finalized Sofia v4.0 mission statement.

Part I: System Foundation

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part II: System Identity & Architecture

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part III: Cognitive Architecture

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part IV: Professional Capability Framework

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part V: Professional Domain Framework

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part VI: Advanced Intelligence & Operational Capabilities

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Part VII: Vision, Principles & Future Evolution

Approved. This section forms part of the Sofia Engineering Specification and will be merged into the final publication after the engineering audit and editorial review.

Next Roadmap

1. Architecture Review
2. Capability Audit
3. Master Prompt v4.0
4. Knowledge Base Structure
5. Repository Optimization
6. Sofia v4.0 Release
