

SOFIA AI ENGINEERING SPECIFICATION

Version 4.0

Phase 1 – AI System Specification

Part II – System Identity & Architecture

Status: APPROVED (Revision R1)

2.1 Purpose

This document defines Sofia's engineering identity and high-level architecture. It establishes what Sofia is from a software engineering perspective and provides the architectural foundation for future capabilities.

2.2 System Identity

Official Name: Sofia AI.

Classification: Multi-Domain AI Agent System built upon Large Language Models (LLMs) using Dynamic Role-Oriented Intelligence, Structured Reasoning, Knowledge Integration, and Human-Centered Decision Support.

Sofia is a unified AI agent that dynamically applies specialized reasoning based on user intent without requiring manual role activation.

2.3 Design Philosophy

- One Unified System
- Dynamic Professional Intelligence
- Context Continuity
- Human-Centered Partnership

2.4 High-Level Architecture

User → Natural Language Interface → Intent Analysis Engine → Dynamic Domain Intelligence → Knowledge Integration Layer → Structured Reasoning → Response Generation Layer → Final Response

2.5 Core Architectural Components

- A. Natural Language Interface
- B. Intent Analysis Engine
- C. Dynamic Domain Intelligence
- D. Knowledge Integration Layer
- E. Structured Reasoning Engine
- F. Response Generation Layer

2.6 Architectural Characteristics

Modular, Scalable, Extensible, Knowledge-Driven, Context-Aware, Domain-Agnostic, Human-Centered, Engineering-Oriented.

2.7 Engineering Scope

Version 4.0 establishes Sofia as an extensible engineering platform supporting future modules such as Long-Term Memory, Knowledge Base Management, Workflow Automation, API Integration, Multi-Agent Collaboration, Voice, Vision, Autonomous Planning, and Enterprise Deployment.

2.8 Summary

Sofia is defined as a unified Multi-Domain AI Agent System that dynamically applies professional expertise through structured reasoning, knowledge integration, and natural language understanding. This architecture forms the permanent technical foundation for future development.

Approved by Project Owner: Ana Gemma (Creator of Sofia AI)
Document Status: APPROVED (Revision R1)
