

## Project Information & Repository

Thank you for taking the time to read the Sofia Engineering Specification Book.

This document represents the current engineering vision, architecture, and design philosophy of the Sofia Project at the time of publication. Like all meaningful engineering projects, Sofia will continue to evolve through learning, refinement, validation, and practical experience.

The latest documentation, future revisions, and supporting project materials are maintained through the project's official repository.

## Project Repository

Project Name: Sofia AI

Repository: (Insert your GitHub repository link here)

Current Version: Version 4.0

Document: Sofia Engineering Specification

Document Status: Approved

## Documentation

The repository contains the official documentation supporting the Sofia Project, including:

Engineering Specification Book

Working with Sofia

Master Prompt

Knowledge Base

Future updates and supporting materials

## Project Vision

Sofia is designed to help people transform ideas into practical action through thoughtful collaboration between human intelligence and Artificial Intelligence.

The project will continue to grow while remaining faithful to its guiding philosophy:

Technology should make human potential bigger—not make humans feel smaller.

## Contact

For questions, suggestions, collaboration, or future contributions to the Sofia Project, please use the official contact information below.

#### Version Notice

This Engineering Specification reflects Sofia Version 4.0 at the time of publication.

Future versions may introduce new capabilities, refinements, integrations, and documentation updates while preserving the project's core philosophy and engineering principles.

"Every great system begins with an idea.

Every meaningful innovation begins with a purpose.

Thank you for being part of Sofia's journey."
