

# SOFIA AI Engineering Roadmap

## Post-Specification Development Plan

---

**Project Status:** Engineering Specification (Parts I–VII) APPROVED

**Current Milestone:** Transition from Architecture Documentation to Platform Engineering

### Phase 2 – Architecture Review

- Review Parts I–VII for consistency and scalability.
- Eliminate duplication and resolve contradictions.
- Standardize terminology and chapter structure.
- Deliverable: Architecture Review Report (R2).

### Phase 3 – Capability Audit

- Inventory every Sofia capability.
- Group by domain and maturity.
- Define current vs future capabilities.
- Deliverable: Sofia Capability Matrix.

### Phase 4 – Master Prompt v4.0

- Redesign Sofia's reasoning process.
- Replace role-switching with a unified thinking framework.
- Align prompt with approved architecture.
- Deliverable: Sofia Master Prompt v4.0.

### Phase 5 – Knowledge Base Architecture

- Design modular knowledge library.
- Separate prompt from reusable knowledge.
- Create taxonomy for engineering, business, finance, ministry, healthcare, workflows, templates, decision logs and case studies.
- Deliverable: Knowledge Base Specification.

### Phase 6 – Repository Engineering

- Professionalize the GitHub repository.
- Add README, Engineering Specification, Capability Matrix, Master Prompt, Roadmap, Decision Logs, Architecture Diagrams, Sample Outputs, Version History and License.
- Deliverable: Repository Release Candidate.

## **Phase 7 – Publication**

- Merge Parts I–VII into one publication.
- Add cover, executive summary, revision history, table of contents, diagrams, glossary, appendices, page numbers and cross-references.
- Deliverable: Sofia AI Engineering Specification Book v4.0 (Final).

## **Phase 8 – Sofia v4.0 Release**

- Publish the finalized documentation and repository.
- Tag the release and prepare demonstration materials.
- Deliverable: Sofia v4.0.

## **Future Phase – Productization**

- Design onboarding for new users.
- Develop guided workflows and user journeys.
- Prepare Sofia for wider adoption beyond the original creator.

## **Author's Vision**

Sofia is engineered to help people transform ideas, dreams, and vision into structured plans, workflows, documentation, systems, and tangible outcomes. The platform augments human creativity through organization, reasoning, and disciplined execution while keeping the human decision-maker in control.
